

Hydro-Dyne on Display at Annual FWRC Exhibition May 1-3

OLDSMAR, FLORIDA — April 14, 2011 — Hydro-Dyne Engineering Inc. (HDE) is exhibiting at the Florida Water Resources Conference (FWRC) in Kissimmee, Florida on May 1-3 in booth #801. Stop by the booth to find out how Hydro-Dyne can design and build a full headworks solution that is specialized for your individual needs.

Examples of the company's unique screening systems will be on display, including grid designs in laced links, woven mesh or perforated panels. Whether your water or wastewater flows are 100gpm or 100+ mgd, Hydro-Dyne can customize the perfect solution.

About Hydro-Dyne

Hydro-Dyne Engineering is an innovator in the municipal and industrial water and wastewater markets. We are inventors, engineers and manufacturers of your complete headworks solution, including screens, washing compactors, conveyors and grit removal equipment. Time tested designs dating back to 1978 and newly patented equipment are manufactured in Oldsmar, Florida, by employees dedicated to high end service.
