

Dusky Shark Septage Receiving Station

Dusky Sharks are renowned for eating everything, including garbage. And like this shark, the Dusky Shark Septage Receiving Station is ideal in screening material out of septage or grease trap wastewater flows.

Available with center flow and through flow screens

Several models available to handle low and high flow rates

Effortlessly screens high TSS and FOG flow

Patented grid design maintains opening tolerances for life

Fully enclosed for safety, aesthetics and odor control

Continuously cleaned

Dedicated washing compactor

All maintenance above tank

All stainless steel fabrication

No rotating brushes

CENTER FLOW SCREEN MODEL

Highest Screening Capture Ratio
(84% for 6mm and 93% for 2mm)

No screen bypass or carry-over

Compact footprint

Proprietary Bypass Gate allows for simple flow bypass

Excellent for sensitive process protection

THROUGH FLOW SCREEN MODEL

Continuous belt design eliminates jamming and significantly reduces maintenance

Easily captures and removes rags

Large particle removal

OPTIONS

Controls are offered from basic operation to sophisticated automation

Monitoring, measuring and billing features

Cold weather protection

Slotted or perforated screening options

Rock trap and overflow bypass

Electric, hydraulic or explosion-proof drives
